**Kriterier for optagelse på dansk brødhvedeliste**

Kvalitet og dyrkningsstabilitet For protein, faldtal og rumvægt gælder kravet per lokalitet med én mulig fravigelse per egenskab per år.		Egnethed til brødproduktion <sup>1)</sup>	Indstilling
1) Protein $\geq$ 11,0 pct.	Positiv i 2 år →	Positiv →	Optagelse
2) Faldtal $\geq$ 250 sekunder		Negativ →	
3) Rumvægt $\geq$ 750 g/kg	Negativ i 2 år →		Afvisning
4) Brødvolumen $\geq$ 90 pct. af referencegrundlaget (2 lokaliteter)	Negativ for ét af pkt. 1-3 i 1 ud af 2 år →	Negativ →	Tilbud om 3. år
		Positiv <sup>2)</sup> →	

<sup>1)</sup> Fundet egnet ved mindst én af de involverede handelsmøller

<sup>2)</sup> Fundet egnet ved to af de involverede handelsmøller.
